Buying HSE training products can be confusing. There are so many options available at so many different prices. Which ones do you need? Which ones are worth paying more for?

We partner as a resource with leading companies to develop our products, solving real training problems and providing real solutions with real results.

Our goals for your firm are...

1. To provide low cost premium HSE training for clients for risk reduction and meet operator and compliance training requirements.
2. Be a simple to use, easily understood blended training suite that provides the client with multiple training options.
3. Provide HSE training to their employees which any client can and **WILL** use.
4. Provide a system which requires a minimum amount of client resources to implement and use. (IT / managerial etc.)
5. To assist firms to fulfill the audit requirements mandated by various government agencies and operator companies.

From these field experiences, CDP introduces to you *Simple Options* use by firms worldwide to achieve these HSE training goals.

- Carbon Dioxide
- Carcinogens (MR)
- Caustic Soda Solutions

About us

In the 1970's, our founder was crippled in a mining accident. His job training for the job consisted of 45 minutes of instructions on how to drive a TEREX rock truck fully loaded up and down a mountain. The training was inadequate and he is paying the consequences for the rest of his life. He understands that an injured employee and his employer are not the only ones affected. Entire families are affected, many times for generations. That's why we are in this business, to make training available (and affordable) for anyone to assist in preventing injuries at work or home.

Our vision

It's simple, when it comes to safety, we want everyone to be trained; No Excuses, No Bull. We focus our efforts in creating effective affordable and accessible solutions so that everyone can be trained, minimizing the cost, the resources needed, and train 24/7, anytime and place.

Our goal & training model

Goal: Develop a global community to support a social constructionist framework of QHSE education.

Model: Provide FREE training to any firm which desires or needs to train plus the ability to upgrade to premium services for needed compliance and operator reporting. As your firm grows the reporting of training completion will increase and you will desire full database rather than individual trainee course reporting. For example, If you have in excess of 100 trainees taking 20 courses each (2,000+ individual reports to track and document) you will be able to justify the cost of the upgrade in time savings and/or administration costs. Do upgrade if using the FREE training service costs you more in time and productivity tracking manual training records than the cost of the Premium upgrade with full reporting... so, upgrade to PREMIUM Plus Training service which you will find to be the best value available, \$47.56 per trainee per year, with unlimited training on all the courses in the course catalog.

Client comments

Hector E. Cavazos

CHESM advisor at Chevron

CDP works to provide OSHA compliance training at a very reasonable cost to his clients in various industry applications "CDP has helped me put together automated training packs with timed narration. He did a great job!! The work was high quality and it was always completed on time.

Hired CDP as a IT Consultant in 1999-2014, and hired CDP more than once

Top qualities: Great Results, Expert, Good Value

David Spall" April 30, 2014

Top qualities: Great Results, Expert, Good Value

David Spall - BP Pipelines

First hired CDP as a IT Consultant in 2008, and hired CDP more than once

"I highly recommend CDP and Troy for his work in the deployment of our online web-based Safety Training process. CDP has save 10,s of thousands of dollars for several companies that I have been safety Director or higher positions within our training development process. In fact, because of Troy's direct efforts, he save one company, Cat Tech over \$ 50,000 on one job alone which paid for the initially investment of our training programs cost, 5 fold. CDP's training products are professionally done and extremely cost effective." April 30, 2014

"CDP provides us with a good on-line training product. His service and response to requests for assistance are excellent."

Top qualities: Good Value, On Time, High Integrity

Harvey Spiller

First hired CDP as a Online Safety training provider in 2011

"CDP is personable with a product that is a great value." May 22, 2014

Top qualities: Personable, Expert, Good Value

Rick Gurgos - Standard Aero

hired CDP as a Business Consultant in 2008 for online training, and hired CDP more than once

"CDP has always listened to our needs for Safety Training, then made recommendations for procedures and program content. He then developed and implemented the necessary program to complete tasks required to make our on line training the best in the business.

CDP is our "go to" reference when we have any problems in this area and he has always been there for us." May 15, 2014

Top qualities: Great Results, Personable, Expert

Billy Cain

First hired Troy as a On Line training and consultant in 2006

"I first hired CDP to supplement our in-house safety program. CDP's consistent endeavors to bring "more-to-the-table" led to me putting our entire safety training program on-line and provide much better and more consistent content for our employees. Troy was always thinking outside the box and bringing us solutions to our problems and suggestions for areas of improvement. He helped to reduce the training workload for our safety manager and by providing the same content for all employees, we were assured that everyone was getting the same training and nothing was being omitted. I will continue to utilize Troy and CDP for all of our safety training needs." May 8, 2014

Top qualities: Expert, Good Value, Creative

Courtney Ross

First hired CDP as a Business Consultant in 2010, and hired Troy more than once
